

I am so very delighted about how terrific I feel! Here's my success story.

As an enthusiastic advocate of chiropractic care for over 30 years, I have enjoyed really good health, which I attribute to regular and timely visits to my chiropractor (in those 30 years, that has meant two chiropractors). I recently moved from New Jersey to Pennsylvania—deciding that I would find a new chiropractor. However, after a couple of preliminary calls (I really wanted a doctor that practices kinesiology). I had a couple of visits to a nearby doctor because I could no longer ignore my aching neck. Those visits did not meet my level of expectation. My neck (and several other complaints) were now really getting my attention so I decided I needed to return to New Jersey and visit Dr. Horning. Good friends had recommended him several years ago, but I had been reluctant to switch doctors.

It was apparent from the start that this office was going to do things differently! Within a couple of visits my neck was so vastly improved that it became a non-issue in my life. There were other health issues that I had long ago decided I would have to live with—daily nuisances—everybody has them right? Wrong! Many things have changed since becoming Dr. Horning's patient. I am a new person whose very good health has become even better. I made an excellent decision to switch doctors – life is good! I am extremely grateful that I make chiropractic care a priority in my life.

Thank you Dr. Horning and Staff

Marianne C.
